ANTIOCH, ILLINOIS, THURSDAY DECEMBER 11, 1919

VOL. XXXIII. NO. 41

SUPERVISORS ARE NOW IN DEC. SESSION

Largest Item of \$10,000 For Special Deputies on Strike Duty Acted on

STEEL CO. MAY SHARE EXPENSE

The board of Supervisors of Lake county began their December meeting Tuesday morning. The largest item thus far brought before them is the bill of \$10,000 for the services of special deputies during the steel strike.

The bill was referred to the finance committee for investigation and it was suggested by Supervisor Kirschner that inasmuch as the steel corporation at Elgin had paid a part of the expense for deputy hire in that county, that the committee investigate with a view to getting the American Steel & Wire company to share the expense with this county.

The special deputies were paid two dollars per day while the regular deputies who served all day, were allowed four dollars. The special deputies worked morning and evening, each putting in about four hours.

The bill also includes the wages of the special officers who guarded homes and property of steel workers, against whom threats had been made or to those to whom damage had already been done.

Sheriff Green stated that he had acted under Governor Lowden's orders and those of Adjutant General Frank S. Dickson, in the entire matter and that the County would have been responsible for any damage done to either the property of the steel mill or to the workers.

A carefully itemized bill has been prepared by the sheriff and was placed before the board. The special deputies were called together in the court house recently and at that time they turned over their clubs and stars to the sheriff and were relieved from duty.

The individual checks for these deputies will range anywhere from six to fifty-six dollars apiece.

The Supervisors were also notified that hereafter the state highway commission will hold examinations for county superintendent of highways in all counties of the state. It was explained that five names are to be submitted to the state board for examination. This includes the present highway superintendent in Lake county who is thus required to take the examination before he can be re-hired for the position.

Mr. Russell was hired by the board before the state law requirement became effective. His six year term ends this year.

The board was unanimous in the belief that a man filling the job should give all his time, at least 8 hours a day to the highway work.

Masons Will Install

Officers Dec. 17

At the last meeting of Sequoit lodge A. F. & A. M. the following officers were elected for the ensuing year:

Arthur Rosenfeldt—Worshipful Master.
Horace R. Adams—Senior Warden
E. S. Garrett—Junior Warden
Ernest L. Simons—Treasurer
Frank B. Huber—Secretary.
The Worshipful Master elect has made the following appointments:
Jos. Fernandez—Senior Deacon
Ray Webb—Junior Deacon
F. L. Middendorff—Senior Steward
B. A. Trieger—Junior Steward
Elmer Brook—Marshall
Frank Kandlik—Chaplain
J. R. Cribb—Tyler

The installation will be held Wednesday evening, December 17.

Are Still Working

For Good Roads

The Commercial association meeting held last Monday evening was very well attended. It was voted to start grading the Grass Lake road at once, the work to be done under the supervision of Frank Dunn. The committee reported that a very good grade of road gravel had been located on the Herman place at Bluff Lake.

Mr. Dunn stated that he would make every effort to get the work of grading started this week.

Train Service on Soo Line is Changed

Beginning with Monday morning of this week four trains were taken off the Soo Line. This change will of course make quite a difference in the service between Antioch and Chicago.

Train No. 18, southbound, which left Antioch at 6:40 a. m. has been discontinued, but to make up for its loss train No. 4, which arrives here at 7:40 a. m. will stop on flag for Chicago passengers.

Train No. 5, northbound, which arrived here at 9:22 a. m. has been discontinued. Train No. 6, southbound, which left Antioch at 4:55 p. m. has been discontinued and train No. 17 northbound, which left Chicago at 5:30 p. m. but did not stop in Antioch has been discontinued.

These changes will make it impossible for any one in Chicago to reach Antioch before 8:28 in the afternoon.

Train No. 3, northbound, which leaves Chicago at 6:35 and arrives in Antioch at 8:06 p. m. remains unchanged.

Beer Bottles, Cases, etc., Were sold for \$1,000

Theodore Becker, chief of police of Zion City submitted to Judge Edwards an itemized account of the money received from the sale of beer bottles, cases, barrels, kegs, etc., that were left after they had completed the pouring into the sewer of 17,000 bottles of beer which had been confiscated by the court. The bottles, cases, etc., were sold to a junk dealer at Waukegan.

According to Chief Becker's report the containers were disposed of as follows:

445 gross of bottles at \$2 a gross, \$890.
381 barrels at 10 cents per barrel, \$38.10.
702 empty beer cases at 10 cents, \$70.20.

24 kegs at 10 cents each, \$2.40.

This was not clear profit, however, for Chief Becker has listed the following expenses incidental to the destruction:

Hauling beer to dumping station, \$31.75.

Services of men to pour the beer, cost of building trough, \$34.21.

These costs have been deducted from the money received from the sale of bottles, etc. Chief Becker has turned over to the county treasurer.

Other expenses such as the fees of constables who made the arrests, guards who saw that the beer was not stolen, justice fees, etc., have been paid by the beer runners who have pleaded guilty and paid fines.

Miss Emma Turner Becomes

Bride of K. K. Kimball

On Saturday, Nov. 29, at the LaSalle hotel in Chicago, occurred the marriage of Miss Emma Turner to Mr. K. K. Kimball, the ceremony being performed in the presence of only a few immediate relatives.

The bride is the daughter of Mr. and Mrs. Joseph Turner of Grayslake former residents of this village. She is a well known and popular young lady and has hosts of friends who wish her the best that life affords.

Mr. Kimball is a young man who has been employed at Grayslake during the past summer with the Government survey gang, and is recognized as having exceptional ability in his chosen profession.

After spending a few days at the home of the bride's parents the happy couple left for Lincoln, Neb., where they will make their home temporarily.

The best wishes of a large circle of friends follow them to their new home.

County Board is Asked to

Build New Womens Dept

Another story will be added to the Lake county jail if the county board of supervisors follow the suggestion contained in the report of the December grand jury returned in circuit court Thursday afternoon. The need of another floor is seen by the grand jury.

The report followed the inspection made of the county jail, a plan followed by every grand jury. It is pointed out in the grand jury report that the women's department of the county jail is inadequate to accommodate the number of female prisoners who frequently are in charge of Sheriff Green. On those occasions the women's quarters are taxed beyond their normal capacity and conditions are not what they should be.

In consequence the Board of Supervisors are urged to consider the advisability of placing another story on the present jail, the added story to be used for the women's department.

Recommendation is made also that an elevator be installed so that the upper floors of the jail can be reached with more facility. This is an improvement that has been needed for a long time but will be a positive necessity if the additional story is built.

COAL STRIKE CALLED OFF; MINERS GO TO WORK FRIDAY

There Will be Plenty of Coal in a Few Days With the Help of Labor and Cars—Altho Fuel Lid Will Stay on Until Coal Reserve is Built up

ANTIOCH SHOULD ABIDE BY FUEL-LIGHT REGULATIONS

The coal strike is settled.

This short sentence of five words was the cause of unlimited rejoicing throughout the United States when it flashed over the wires to every locality. The miners will return to the pits Friday morning, thus ending a walk out of forty days.

The President's proposal for a settlement was adopted Wednesday afternoon at the conference of the leaders of the United Mine Workers, the acceptance being practically unanimous, only one dissenting vote being cast.

A notice directing all strikers in the bituminous fields to return to work was prepared and telegraphed to the 4,000 local unions.

But the end is not yet. There is a big shortage to be made up and with the present cold weather making heavy demands upon the supply it will be some time before conditions will again return to normal.

We may be a small village, but just the same it takes a lot of coal and light to keep moving. Let us do our share in cutting down on heat and light and help to conserve the coal. Cut out those window display lights and as many as are not needed in the store. Keep the heat down to 68°, just low enough to keep our good health. We

hear many say shut off our street lights. No, they are considered safety lights. Take into consideration the shortage—look at your coal bin and don't say "oh well when that is done we can buy cord wood." Cord wood averages \$14.00 a cord now. Help yourself conserve, don't wait until the government comes along and starts handing out cards to everyone, calling for so much allowance of coal and no more.

Here we are going right along as if there were no such thing as coal shortage while every other village hereabouts is doing something to help in the present crisis. In Waukegan the stores do not open until noon and close at six o'clock. Many smaller places are following the same plan.

The students at the Lake Forest College will get a three weeks' vacation for Christmas instead of the usual two. The order was issued Wednesday by the board of directors as a measure for fuel conservation.

Even though the coal strike is settled the public must not deceive itself by thinking that this settlement means an immediate supply of coal. The shortage will not be relieved for some time and the present supply should be made to last to the limit.

KING WINS OVER PACINI

\$200 WITH INTEREST

The case of King vs. Pacini was settled in Circuit Court today and resulted in favor of the plaintiff Frank R. King.

The case grew out of a deal which was made in the spring of 1918, where by King was to purchase the ice cream and confectionary business of Pacini. To bind the bargain King paid \$200.00 down. Then the deal fell through. King wanted his money back. Pacini claimed it was King's fault that the deal was not consummated and refused to give up the \$200.00. King claimed Pacini defaulted on his contract and started suit. The case was tried in Justice court in May and the jury returned a verdict in favor of the defendant. King took the case to Circuit court and won. He was awarded the \$200.00 and interest to date.

C. LOOF DIES AT

AGE OF NINETY-THREE

The funeral of Christoffer Loof, an aged resident of Grass Lake was held at the home last Saturday afternoon with Rev. Pollock in charge. The interment was in the Grass Lake cemetery.

Mr. Loof was born in Germany in the year of 1826. He was married in that country and was later left a widower with two children. In the year of 1867 with his children he came to America and settled near Fox Lake. In 1868 he was again married and to this union three children were born, all of whom have passed away.

He is survived by his widow, and one son Fred, also by two grand children and two great grand children.

Think! twelve more shopping days until Xmas.

THE HARVESTERS.

Many of America's most pleasing comedies on the stage, in the movies and on the entertainment platform have their beginnings amid rural surroundings. There is something about the country with its fields of grain, its orchards and its outdoor life which appeals to every one.

No time of the year in such surroundings is more picturesque and inviting than harvest time. It is amid just such scenes that The Harvesters appear in the initial setting of their evening's program.

An interesting story touching on both rural and city life runs through and binds together the entire production. Every song is introduced logically as an integral part of the sketch.

The story alone is so clever that it would score a success even without the music. The music would be a success without the story. But the music and the story combined are an exceptionally strong offering—unique, artistic and interesting.

The evening opens with the mem-

bers of the company appearing in farm costumes and singing old-time songs. While seated at the supper table a telegram is received. To make a long story short this message results in all three leaving the farm in response to what they consider an opportunity to develop their musical talents in the distant city.

Their various musical appearances in their new surroundings offer a setting for the presentation, in evening dress, of selections from the standard operas and other features of compelling interest.

Character readings in costume by Wilbur Beatty serve as an introduction to one part of the program.

Lively, up-to-date music, readings and songs comprise the finale. The entire program radiates the spirit of good humor.

The personnel of the company is especially well selected. The Harvesters have been organized and coached by Sandor Radanovits, noted Chicago producer, who has produced some of the strongest companies on the Redpath list.

This company will appear on the Lyceum Course in Antioch on Saturday evening, December 20, in the High School Auditorium.

Weather Report for the Month of November

Nov. 1919—Warmest day 56 on the 10. Coldest day 12 above on 30th. Average temperature 35.6 Total rainfall 1.76 inches.

Nov. 1910—Warmest day 62 on the 8. Coldest day 16 above on the 22. Average temperature 35.28. Total rainfall 21 inches.

Three Million Catholic Seminary to Built at Area

Plans for the building of a \$3,000,000 theological seminary at Area, near Libertyville, for Roman Catholic candidates for the ministry were made simultaneously with the celebration of the fourth anniversary of the transfer of Archbishop Mundelein to the archdiocese of Chicago.

The school project marks the climax of a movement begun by the archbishop with the establishment of Quigley preparatory seminary at Rush and Pearson streets, which is practically for dedication. The buildings are exact duplicates of Sainte chapel in Paris.

Heretofore graduates of this school had to go to seminaries in Baltimore, St. Louis and Milwaukee for their philosophical and theological training. As soon as the Area seminary is completed they can be trained there.

On the site at Area is a large lake, which will be partly filled in and utilized in the landscape arrangement of the grounds. A beautiful chapel will be erected and numerous buildings for dormitories, lecture halls and laboratories.

Just as Quigley preparatory seminary was a memorial—the gift of the Cuddeys—so it is expected that many memorial gifts will make possible the new graduate school.

The fourth anniversary of the accession of the archbishop of Chicago was celebrated at the cathedral in Chicago by a high mass in his presence.

Royal Neighbors

Elect Officers

At their meeting last Tuesday evening Olson Camp No. 459 R. N. A. elected officers for the ensuing year as follows:

Oracle—Laura Dupre
Vice Oracle—Myrtle Chinn
Past Oracle—Emma Thayer
Recorder—Olive Keulman
Receiver—Erma Powles
Marshal—Hattie Chinn
Chancellor—Jessie Runyard
Inside Sentinel—Deborah VanPatten
Outside Sentinel—Frieda Wertz
Manager—Sophia Martin
Physician—Dr. Warriner.

E. Z. Club Holds Card

Party at Martins

Last Wednesday evening the E. Z. club met at the home of Mr. and Mrs. George Martin. It being a very cold evening the club was compelled to motor over to Martins on a hay rack, very slowly. Gideon got excited and could not wait for the wagon so hitched up his span of ponies and hurried over there in time for his wife to capture first prize, and of course Frank was on hand to carry home his usual booty prize. Mike started to walk over but soon learned Frank had gone, so he turned homeward as he knew Frank would sure get the prize. Those that missed going have regretted it ever since, especially Charley. Everybody reported a fine time and all say Mr. and Mrs. Martin are royal entertainers on a cold winter evening.

NEWS ITEMS OF INTEREST

Our Exchanges Have Many Items of Different Events Concerning News

NEWS OF VARIOUS KINDS

Fromm Bros., of Merrill, were paid nearly \$45,000 for 6,200 pounds of ginseng, the largest crop ever raised in the United States.

W. C. Hockings of Burlington, Wis., has gone to Kansas City, Mo., where he will give two exhibitions a day picking and dressing a chicken in 12 seconds.

Janesville is to have a new hotel to cost \$550,000. An incorporated company will build it and stock will be sold to the general public. The young business men of the city will do the soliciting of funds for the project.

John Till, the healer, who some years ago carried on an extensive practice in medical work, has formed a corporation in Barron county to conduct what is to be known as the "Till Institute" under licensed medical supervision.

Robert Collins, victim of a railroad accident last August, when he slipped and fell in alighting from a passenger train in Harvard and lost his foot, has received \$4,000 and also hospital bill and surgeon's fees from the Northwestern railroad company.

Elkhorn is practically assured of having a pea cannery in operation next season. A plot of land south of the passenger depot has been purchased from Le Grand Rockwell and the Elkhorn Lumber company and the work of erecting the necessary buildings will be started as soon as possible.

Merlin J. Meyers of Elgin is the victim of the latest freak automobile accident. Meyers had poured alcohol in the radiator of his machine to prevent freezing. Wednesday night he proceeded to see how much water was in the radiator. After removing the cap he held a lighted match over the hole. The alcohol fumes were ignited and he was badly burned.

Expectations on automobiles for Wisconsin are being far surpassed by actual figures developing at the office of the secretary of state. The total licenses issued this year was 226,073 for automobile, 10,886 for trucks. Last year the full twelve months brought 188,000 applications for automobile licenses and 7,000 for trucks.

Timber wolves are so numerous in Rock county, near Janesville, that the farmers are being forced to abandon raising of pure bred animals. Depredations during the recent weeks have influenced the county board to boost the bounty from \$10 to \$25. The state bounty is also \$25. The wolves invade pastures, barns and chicken coops, report the farmers, and are bold enough to come to the outskirts of the city.

Pacini Wins Suit

In Circuit Court

Last week John Pacini of this place won a suit against the Charles Bender Co., in circuit court when Judge Edwards took the case from the jury and instructed a verdict in favor of the defendant.

Mr. Pacini formerly conducted a fruit store on Genesee and Madison streets in Waukegan. When he sold out there he opened a store on Washington street. He purchased fixtures of Charles Bender & Co., to the value of \$195.00. This was in the year of 1916.

In July of the same year Bender & Co., went to Waukegan and under writ of replevin removed the fixtures from the store and took them to Chicago. Pacini contested the suit in Justice court but lost. He appealed to the circuit court and won.

Bender & Co., claimed that Pacini had never paid for the fixtures, but had obtained a receipt for them by fraud. Judge Edwards held with Pacini and took the case from the jury.

Pacini claims that he sustained heavy damages as a result of the replevin of the fixtures and it is said that he plans to start suit for \$5,000 damages against Bender & Co.

DOUBLE BEAUTY
OF YOUR HAIR"Danderine" creates mass
of thick, gleamy waves

In a few moments you can transform your plain, dull, flat hair. You can have it abundant, soft, glossy and full of life. Just get at any drug or toilet counter a small bottle of "Danderine" for a few cents. Then moisten a soft cloth with the "Danderine" and draw this through your hair, taking one small strand at a time. Instantly, yes, immediately, you have doubled the beauty of your hair. It will be a mass, so soft, lustrous and so easy to do up. All dust, dirt and excessive oil is removed.

Let Danderine put more life, color, vigor, and brightness in your hair. This stimulating tonic will freshen your scalp, check dandruff and falling hair and help your hair to grow long, thick, strong and beautiful.—Adv.

SAYS CARRANZA
HAD RED PLOTConspired With Radicals Against
U. S. Government, Senator
Fall Charges.

TO GIVE ASTOUNDING FACTS

Declares Mexican Envoys Are Instigating
Anarchy Throughout the Nation—Ashurst Also Introduces
Resolution.

Washington, Dec. 5.—Senator Fall (Rep.) of New Mexico, offering in the senate a resolution approving the strong stand of the state department in the Jenkins case and providing for withdrawal of recognition of the Carranza government by the United States and a complete severance of all relations, charged that a revolutionary propaganda had been carried on through the Mexican embassy in Washington, the offices of Mexican consuls-general in New York and San Francisco and the consulates throughout the country, with the knowledge and under the instigation of President Carranza.

The Fall charge followed immediately upon a brief but none the less impassioned speech by Senator Ashurst (Dem.) of Arizona. Senator Ashurst said he would like to see every American in Mexico protected, but because of the attitude of the administration he would be glad to see Americans protected from Mexican marauders even in the United States.

Senator Ashurst also introduced a resolution, under the terms of which the secretary of war would be authorized to use the nation's military forces to protect Americans on the American side of the border who are threatened by the activities of Mexican outlaws or other belligerent factions in the southern republic.

"I charge," said Senator Fall, "that the Mexican embassy, the consulate-general in New York and the consulate general in San Francisco have been actively engaged in the distribution of bolshevist propaganda and that this has been done with the knowledge and consent of Venustiano Carranza."

Explaining his resolution, Senator Fall declared it was based on evidence which would "astound the world" when produced.

Senator Fall's resolution follows: "Resolved by the senate, the house of representatives concurring: That the action taken by the department of state in reference to the pending controversy between this government and the government of Mexico should be approved; and further, that the president of the United States be, and he is hereby requested to withdraw from Venustiano Carranza the recognition heretofore accorded him by the United States as president of the republic of Mexico, and to sever all diplomatic relations now existing between this government and the pretended government of Carranza."

Mexico City, Dec. 5.—The solution of difficulties arising out of international affairs with the United States were entrusted to President Carranza without legislative intrusion by the senate at a secret session here. Relations with the United States were declared during the session as being "very delicate."

FARMERS ROSE TO EMERGENCY

What They Did to Win the War and
Save World From Starvation
Told by Houston.

Washington, Dec. 6.—In his annual report, issued this afternoon, Secretary of Agriculture Houston tells in a brief way how the farmers of America helped to win the war and are saving the world from starvation by marvellously increased production of foodstuffs. He says the wheat crop for 1919 is estimated at a million bushels over that of 1918 and that of corn 300,000,000 bushels over the last year's. In meat production, also, the record figure of last year will be exceeded, and the same is probably true of milk, eggs and poultry. Crop yields per acre, says Mr. Houston, show an upward tendency, due largely to better methods and better machinery.

Among other recommendations made by the secretary are: The building up of a system of personal credit unions; expansion of existing facilities and activities for aiding farmers in marketing; continuation of present policy of federal participation in road building; regulation and control of stockyards and packinghouses; protection of consumers against misbranded and adulterated feeds and fertilizers; increased support by states for rural schools, and legislation for improvement of sanitary conditions and medical facilities in rural districts.

MEXICO ACTIONPresident Withholds Decision Until He Investigates Charges
Against Carranza.

CONSUL JENKINS IS FREED

State Department Notified as President Receives Senators for Conference—Executive's Mind is Clear, Senator Fall Believes.

Washington, Dec. 8.—President Wilson reserved judgment on the Mexican situation until he could examine evidence submitted by Senator Fall of New Mexico, on which the senator based his charge that the Mexican ambassador and consuls in the United States had distributed "red" propaganda in the United States.

Senator Hitchcock said that while the president did not express himself as regarding the Mexican situation as extremely grave, he declared it involved possibilities which made it too serious to deal with in any hasty fashion.

On his return to the capitol, Senator Fall conferred with many Republican senators, telling them that mentally President Wilson was capable of handling any question coming before him, and that physically, he was in better condition than the senator had expected to find him.

Senator Fall said that he did not ask the president his views as to whether or not there should be intervention in Mexico, nor did he ask if the president favored the Fall resolution, and the president did not volunteer any information.

When asked if he was satisfied with the president's condition and ability to handle the Mexican situation, Senator Fall said:

"You mean his mental condition?"
"Yes."
"Yes, sir—entirely," the senator replied.

Senator Hitchcock said the president was in rare good humor and told some jokes, one of which particularly concerned intervention in Mexico.

Senator Fall said the president told him he did not know the details of the Mexican situation, but had a general knowledge on the subject.

While the president did not say directly that he would communicate with congress on the Mexican situation, the senators gained the impression that he would have some advice to give before the senate foreign relations committee meets Monday.

Mrs. Wilson was present at the conference, which was held in the president's sick room. Mr. Wilson being propped up in bed. Senator Hitchcock said the president seemed in better health than when he last saw him, more than two weeks ago. His face was fuller, the senator said, and his general condition seemed much improved.

The president asked Senator Fall to prepare for him a memorandum covering some of the disclosures before the senate committee investigating Mexico, of which Mr. Fall is chairman.

The conference had been in progress only a few minutes when Secretary Lansing sent for Doctor Grayson to inform him that Consular Agent Jenkins had been released from the Puebla penitentiary.

"This nearly broke up the conference," one of those present jokingly remarked in relating the incident.

The American embassy at Mexico City notified the state department that American Consular Agent William O. Jenkins, at Puebla, Mexico, had been released from custody.

The secretary of state announced that a dispatch from the embassy stated that Third Secretary Hanna of the embassy, who was sent to Puebla in connection with the department's repeated representations for the immediate release of Jenkins, had reported that Jenkins was released from the penitentiary.

TABORS LOCATED IN OREGON

Kin of Dead Michigan Woman Found
In That State on Way to
California.

Walla Walla, Wash., Dec. 5.—A Mrs. Lester Tabor and a Walter Tabor were working in Freewater, Ore., two weeks ago, according to information received here. It was said when they left they intended going to California. Persons of those names are being sought in connection with the death of Miss Maud Tabor at Lawton, Mich.

Lawton, Mich., Dec. 5.—"From the evidence we have gathered it appears that the whole Tabor family, the mother, the sister, the brother and the sister-in-law—that all had knowledge of the death of Maud Tabor," said Prosecutor H. H. Adams.

Suspend Juries in Ireland.
London, Dec. 6.—The British cabinet, according to the Daily News, has decided to suspend trial by jury for crimes of violence in Ireland and to substitute trial by commission of three judges.Villa Capture a Myth.
El Paso, Tex., Dec. 6.—Andrea Garcia, Mexican consul, received a telegram from military headquarters at Chihuahua, saying the report of the capture of Francisco Villa was not true."CALIFORNIA FIG SYRUP"
IS CHILD'S LAXATIVELook at tongue! Remove poisons
from stomach, liver and
bowels.

Accept "California" Syrup of Figs only—look for the name California on the package, then you are sure your child is having the best and most harmless laxative or physic for the little stomach, liver and bowels. Children love its delicious fruity taste. Full directions for child's dose on each bottle. Give it without fear.

Mother! You must say "California."
—Adv.A Rebuke.
"So this is the office of the Clarion?"
"Yes," replied the editor, proudly."A temple of truth."
"Tell the truth and shame the devil," eh?"

"Sir, the office 'devil' has nothing to do with the editorial policy of our paper."—Birmingham Age-Herald.

Freshen a Heavy Skin
With the antiseptic, fascinating Cuticura Talcum Powder, an exquisitely scented convenient, economical face, skin, baby and dusting powder and perfume. Renders other perfumes superfluous. One of the Cuticura Toilet Trio (Soap, Ointment, Talcum).—Adv.

DREW NO STRONG HYPOCRITE

Absence of Such a Dominating Character From Shakespeare's Pages
Explained by English Novelist.

Material for discussion among those who more or less know their Shakespeare has been provided by Sir Walter Raleigh's suggestion on the lecture platform that Shakespeare created no complete and carefully drawn figure of a hypocrite because the dramatist had had a free and happy childhood.

"It is the child," says Sir Walter, "who sees hypocrites;" and so, as one follows the argument at second hand in the column of a newspaper, Dickens, who had a harsher childhood, was more impressed by hypocrisy, and later wrote about hypocrites. One suspects, however, that there may be readers who will deny that Shakespeare failed to include the hypocrite in his remarkable gallery of dramatic portraits.

Hypocrisy certainly figures; one has only to recall the behavior of Gloucester or Iago to find the characteristic, but Sir Walter no doubt has ground for his conviction that the plays contain no figure dominated by it.

Preparedness.
The stage coach bumped along over a very mountainous country road, till it came to a place noted for its many holdups. The passengers were somewhat uneasy lest a highwayman might step out into the middle of the road.

"Ah, friends, don't be alarmed!" said a pompous old gentleman. "I foresaw the possibilities of an attack and I have two loaded revolvers in the bottom of my trunk."

To Win Success.
The talent of success is nothing more than doing what you can well, and doing well whatever you do without a thought of fame.—Longfellow.AT WAR WITH YOURSELF
Help Nature to Defeat the
Disease in Your BodyKeep up the fight; do not give up.
Nature is trying to serve you in conquering the wrongs that may exist.

Red blood, vim, courage, vitality, all seem lacking. No wonder you are nervous and discouraged.

Why not call to your aid a strong, dependable ally? Dr. Pierce's Golden Medical Discovery has for nearly fifty years proven its merits as a most powerful tonic and blood builder to the many thousands who have been returned to good health by its use.

Savanna, Ill.—"I was suffering with liver complaint and my blood was impoverished. I had backache and felt miserable all over. For my ailments I took Dr. Pierce's Golden Medical Discovery, and it was very beneficial in every way. It rid me of my ailments and my health was much improved after its use."—Ira Clark, 1255 N. Main St.

Joliet, Ill.—"I have taken Dr. Pierce's Golden Medical Discovery as a tonic and blood purifier and found it very beneficial, and I always keep the 'Pleasant Pellets' on hand to take as a regulator. I find that they keep me in a healthier condition than any medicine I have ever taken. They are fine for constipation and an excellent regulator of stomach, liver and bowels.

"I think so well of these medicines of Dr. Pierce's that I am always recommending them to my friends and have never known of one instance where they have not given perfect satisfaction."—C. W. Johnson, 610 Second Ave.

FINALLY SUBDUED FOREST FIRE

Thousands of Volunteers Overcome
Conflagration Which Threatened
Overwhelming Destruction.

A forest fire that threatened, in 13 days of unimpeded destruction, to consume the whole of Angeles national forest, in southern California, was finally brought under control by the desperate efforts of hundreds of volunteers. The unceremonious drafting of curiosity seekers swelled the ranks of the fighters until, in one district alone, around Pomona, more than 1,000 were working day and night to stay the on-rushing flames. The kindling of tremendous buck fires at critical points, guided by airplane inspection, succeeded in holding the fires within the originating area. Many resorts and summer homes were menaced, but only a few cabins were lost. As a result of the fire, the city waterworks of Pasadena is to be protected by a giant firebreak, which will be constructed immediately by the rangers of the United States forest service.—Popular Mechanics Magazine.

His Only Chance.
"Can I get a room for the night?" asked the man of the hotel clerk.
"No," replied the clerk, "we haven't got a room in the house."
"Where in thunder am I going to sleep, then?"
"Why, there's a movie picture show in the next block. They have continuous performances, I believe."Nervous? Restless at Night?

Offended the Herring.

In the fifteenth and sixteenth centuries Helgoland was a center of the North sea herring fisheries. Then the herring veered back to Scotland's coast and the islanders handed down a tale of the impety by which they forfeited the boon. Yearly they would form in procession to march about the island to invoke the coming of the fish. One spring, when they had gone but half the route, the herring were sighted. They abandoned the rite and made for the boats. The herring never came again.—National Geographic Magazine.

Moths in Closets.

Get a wide-mouthed bottle, three ounces will do, and fill it with oil of mirbane. Leave the cork out of the bottle and place it in the trunk or closet in such position that it will not tip over. The fumes are very poisonous to insects. For a very large closet use a larger bottle and larger amount of oil. Renew the oil when needed. Sprinkle heavy blankets, quilts, etc., with the oil of mirbane before packing away.

Proofs of Bigness.

To disagree with the other fellow and still remain friendly; to see the other fellow's viewpoint and still cling to your own opinion with a smile that is sincere; to travel the first 50 miles in company with a crowd quietly and not tell all you know; to smile at the breakfast table and then go to work, not willingly but anxiously, proves that you are a bigger man than the ordinary fellow we find on the pay roll.—Exchange.

Importance of "Now."

"Now" is ever ticking from the clock of time. "Now" is the watchword of the wise. "Now" is on the banner of the prudent. Let us keep this little word always in our mind; and whenever anything presents itself to us in the shape of work, whether mental or physical, let us do it with all our might, remembering that now is the only time for us.—Selected.

Watch the Sun's Halos.

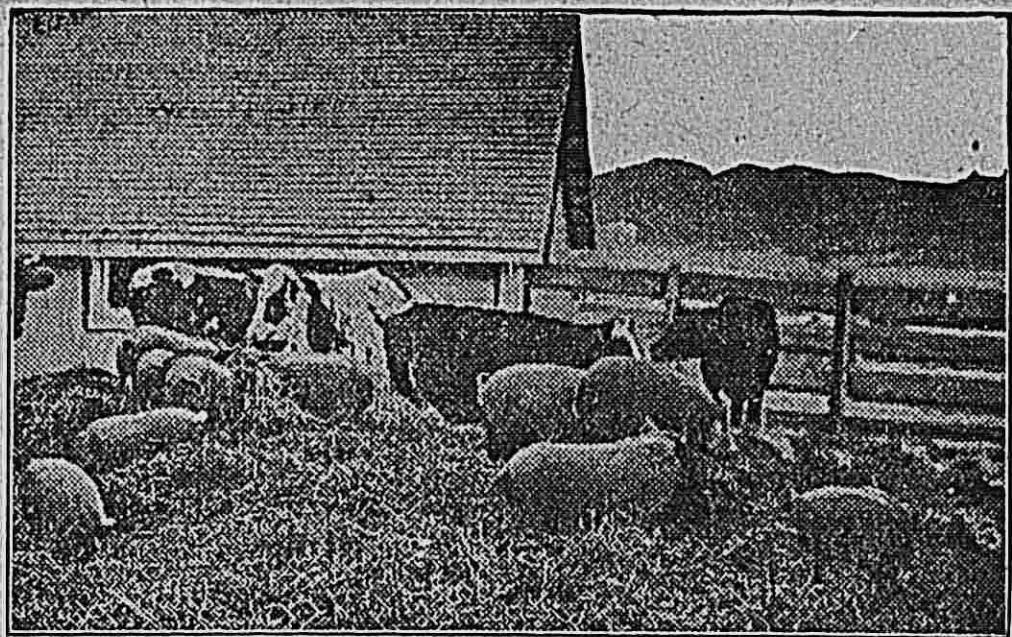

The sun's halos are good weather signs. Many weather proverbs based upon the observation of "halos are

founded upon sound scientific principles. Studies of the relation of halos to rainfall show that during the summer months 50 to 60 per cent of all halos are followed by rain within 36 hours. During the winter months 70 to 75 per cent are so followed.

True Poetry.

True poetry, like true eloquence, is the voice of nature appealing to the heart with its utmost sublimity and power . . . Instead of teaching merely, it persuades, elevates, inspires. It excites a feeling where the other leaves an opinion or a maxim. It proposes examples of ideal excellence, and raises virtue into heroism.—Hugh Swinton Legare.

The Price of Pork Chops and Bacon

Here are reasons why the fine, fresh pork tenderloins, and pork chops, or savory ham, or crinkly bacon, which you enjoy for breakfast, cost much more per pound than the market quotation on live hogs which you read in the newspaper:

An average hog weighs 220 pounds.

Of this, only 70 per cent (154 pounds) is meat and lard.

So, when we pay 15¢ a pound for live hogs, we are really paying more than 21¢ a pound for the meat which we will get from these animals, even after taking into account the value of the by-products.

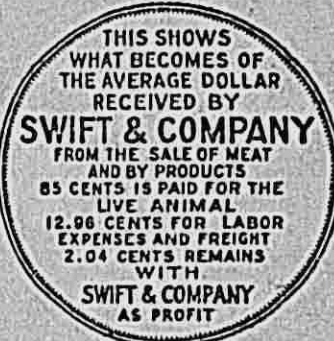

But people show a preference for only one-third of the whole—the pork chops, fancy bacon, and choice cuts from juicy hams.

This means that when we are selling Premium bacon at 43½¢ per pound wholesale and Premium hams at 30¢, there are other parts for which we get as low as 6¢ or 8¢ per pound. The net result is an average profit to us of less than 1¢ a pound.

The choice cuts are higher because of a demand for them.

Another thing: Only 35 pounds of the entire hog—or about 1/6th—is usually marketed at once. The rest must be pickled, cured, or smoked. This takes months, and adds to the costs which must be met.

EASY NOW TO SAW LOGS
AND CUT DOWN TREES

Only one man, or even a boy, with the Improved Ottawa Engine Log Saw can easily cut twenty-five to forty cords a day, and at a cost of less than 2c per cord. This machine, which cuts down all others, has a heavy, cross cut saw driven by a powerful, especially designed 4-cycle gasoline engine. It's a fast money-maker for those using it, and does more than ten men could do, either cutting down trees, sawing logs, or buzzing branches while you rest. When not sawing, the engine can be used for other work requiring power.

Beware of Imitations.

The entire machine is mounted on truck wheels to make it easy to move to the trees or logs, and from cut to cut on a log without stopping the engine. For moving on the road, the truck wheels are placed parallel with the skids and the rig hauled straight ahead. The wheels turn on a two-way spindle. You do not have to take them off, but can change direction of wheel travel by merely taking out a pin.

The Ottawa can be fitted for sawing down trees. It cuts level with the surface of ground, thereby getting all the timber and leaving no stumps sticking up. An automatic friction clutch stops the saw in case of undue resistance. Two men can fall forty to fifty trees a day in ordinary timber. The whole outfit is compact, simple, durable against a lifetime of hard wear. It sells for a low price and is fully guaranteed for reliable operation in the hands of every one who has trees to cut down and logs to work up.

Full information and low factory price to you can be had simply by addressing the Ottawa Mfg. Company, 2724 Wood St., Ottawa, Kansas.

More Than Enough.

I was one of a company of teachers being entertained at dinner one evening. Our hostess urged me to eat more of some delicacy which she passed to me, but I declined, saying: "No, thank you; I'll do well if I get rid of what I have here. Amid the roars of laughter from my fellow guests I realized what a tactless remark I had made. This I am quite sure, has been the most embarrassing moment in my life.—Exchange.

TONIGHT!

Take "Cascarets" if sick,
Bilious, Constipated.

Enjoy life! Straighten up! Your system is filled with liver and bowel poison which keeps your skin sallow, your stomach upset, your head dull and aching. Your meals are turning into poison and you cannot feel right. Don't stay bilious or constipated. Feel splendid always by taking Cascarets occasionally. They act without griping or inconvenience. They never sicken you like Calomel, Salts, Oil or nasty, harsh pills. They cost so little too—Cascarets work while you sleep.—Adv.

Concerted War on Tuberculosis.

A systematic campaign of anti-tuberculosis education has been conducted in France for more than a year, under the patronage of the Rockefeller foundation. Three traveling exhibits and groups of lecturers visited ten departments, and in 141 gave exhibits. During the year more than 2,000,000 pieces of printed matter, posters, pamphlets, postcards, games, etc., were distributed through the whole of France. It is stated that the public material, written by French men and women, and charmingly illustrated by French artists, has set a new standard for popular health public education.

WHY DRUGGISTS RECOMMEND
SWAMP-ROOT

For many years druggists have watched with much interest the remarkable record maintained by Dr. Kilmer's Swamp-Root, the great kidney, liver and bladder medicine.

It is a physician's prescription. Swamp-Root is a strengthening medicine. It helps the kidneys, liver and bladder to do the work nature intended they should do.

Swamp-Root has stood the test of years. It is sold by all druggists on its merits and it should help you. No other kidney medicine has so many friends.

Be sure to get Swamp-Root and start treatment at once.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

The Wise Man.

He is the wisest man who would have the least to do with the multitude. . . . It is not for the wise man to be much affected with the censures of the rude and unskillful vulgar, but, to hold fast unto his own well-chosen and well-fixed resolutions; every fool knows what is wont to be done; but to hold fast unto his own well-chosen and well-fixed resolutions; every fool knows what is wont to be done; but what is best to be done, is known only to the wise.—Joseph Hall.

CONGRESS GETS WILSON'S MESSAGE

Failure of Treaty Ratification Only Mentioned as One Cause of the Unrest That Permeates the Country.

Adoption of Budget System, Simplification of War Time Taxes, Encouragement of Increased Production and Relief for Soldiers Urged—Need of Definite Program for Improving Labor Conditions.

Washington, Dec. 2.—At noon today President Wilson's message was read in both houses of congress. It did not mention the fight over the peace treaty, but did assert that the delay in arriving at a permanent peace was one of the basic causes of the unrest that is disturbing the country.

After explaining that his illness prevented his appearance before congress in person, Mr. Wilson's message continued: "I hope that congress will bring to a conclusion this session legislation looking to the establishment of a budget system. That there should be one single authority responsible for the making of appropriations and that appropriations should be made not independently of each other but with reference to one single comprehensive plan of expenditure properly related to the nation's income there can be no doubt. I believe the burden of preparing the budget must, in the nature of the case, if the work is to be properly done and responsibility concentrated, rest upon the executive. The budget so prepared should be submitted to and approved or amended by a single committee of each house of congress, and no single appropriation should be made by the congress, except such as may have been included in the budget prepared by the executive or congress. The particular committee charged with the budget legislation, and not less important aspect of the problem is the ascertainment of the economy and efficiency of the government. No one is authorized to expend the money appropriated for the purpose of ascertaining whether expenditures have been lawfully made within the appropriations. No one is authorized or equipped to ascertain whether the money has been spent wisely, economically and effectively.

Taxation Question Taken Up. I trust that the congress will give its immediate consideration to the problem of future taxation. Simplification of the income and profits taxes has become an immediate necessity. These taxes, which are the backbone of our government, must, however, be simplified, not only to save the taxpayer inconvenience and expense, but in order that the government may be made certain and its liability may be made certain and its revenue law, the secretary of the treasury and the commissioner of internal revenue will lay before you for your consideration certain amendments necessary or desirable in connection with the administration of the law—recommendations which have my approval and support.

It is of the utmost importance that in dealing with this matter the present law should not be disturbed so far as regards taxes for the calendar year 1920, payable in the calendar year 1921. The congress must well consider whether the higher rates of income and profits taxes can in peace times be effectively productive of revenue and whether they may not, on the contrary, be destructive of business activity and productive of waste and inefficiency.

There is a point at which in peace times high rates of income and profits taxes discourage energy, remove the incentive to new enterprise, encourage extravagance and produce industrial stagnation with consequent unemployment and other attendant evils.

The message then discussed the favorable balance of trade and the need of adjusting our economic life to the changed conditions and of abandoning the policy of isolation. In the matter of recognition and relief for returned soldiers the president repeated the recommendations in his last message. He also urged tariff revision to protect our chemical and dyestuff industries. He continued:

Farmers Are Praised.

During the war the farmer performed a vital and willing service to the nation. By materially increasing the production of his land, he supplied the army and the allies with the increased amounts of food necessary to keep their immense armies in the field. He indispensably helped to win the war. But there is now scarcely less need of increasing the production in food and the necessities of life. I ask the congress to consider means of encouraging effort along these lines. The importance of doing everything possible to promote production along economical lines, to improve marketing and to make rural life more attractive and healthful, is obvious. I would urge approval of the plans already proposed to the congress by the secretary of agriculture, to secure the essential facts required for the proper study of this required through the proposed enlarged programs for farm management studies and crop estimates.

I would urge, also, the continuance of federal participation in the building of good roads, under the terms of existing law and under the direction of present agencies; the need of the action on the part of the states and the federal government to preserve and develop our forest resources, especially through the practice of better forestry methods on private holdings; rather than the publicly owned forests; better support for country schools and the more definite direction of the courses of study along lines related to rural problems and fuller provision for rural problems and the sanitation and building up of needed hospital and medical facilities.

Blames Government for Unrest.

I would call your attention to the widespread condition of political restlessness in our body politic. The lessening of this unrest, while various causes, are superficial rather than deep seated. Probably, they arise from or are connected with the failure of the part of our government to arrive peacefully at a just and permanent peace permitting return to normal conditions.

Human Life Needs Beauty.

Men cannot live by bread alone. The mind cannot develop on an exclusively scientific diet. If we sat on our spiritual globe and studied only the physical laws that keep it going we should become either lunatics or machines. The lines of beauty in the form and decoration of a vase, and the studied harmony of tones and colors that stir the soul, as though they were musical sounds, are like to the inscriptions made on his dungeon walls by a life prisoner, who, with their aid,

drives away madness and keeps his mind sweet."—Chicago American.

Some Fur Everywhere. "There is hardly a farm," says one authority, "that will not produce at least fifty dollars worth of fur each season, especially in the north. Trapping is a pleasant occupation for the farmer and his boys in the fall after the rush of work is ended and before the time used in setting and tending the traps the money derived from it is all clear profit!"

Should Extend Food Control. I renew and strongly urge the necessity of the extension of the present food-control act so that the period of food-control shall remain in operation. The attorney general has submitted a bill for a period of six months. As it now stands it is limited to the period of six months. In operation to the period of six months and becomes inoperative upon the expiration of that period. It is formal provisions of justice have been built up extensive machinery; all purpose of enforcement has been abandoned upon the conclusion of peace unless the provisions of this act are extended.

During this period of six months, have an immediate consideration to the problem of future taxation. Simplification of the income and profits taxes has become an immediate necessity. These taxes, which are the backbone of our government, must, however, be simplified, not only to save the taxpayer inconvenience and expense, but in order that the government may be made certain and its liability may be made certain and its revenue law, the secretary of the treasury and the commissioner of internal revenue will lay before you for your consideration certain amendments necessary or desirable in connection with the administration of the law—recommendations which have my approval and support.

It is of the utmost importance that in dealing with this matter the present law should not be disturbed so far as regards taxes for the calendar year 1920, payable in the calendar year 1921. The congress must well consider whether the higher rates of income and profits taxes can in peace times be effectively productive of revenue and whether they may not, on the contrary, be destructive of business activity and productive of waste and inefficiency.

There is a point at which in peace times high rates of income and profits taxes discourage energy, remove the incentive to new enterprise, encourage extravagance and produce industrial stagnation with consequent unemployment and other attendant evils.

The message then discussed the favorable balance of trade and the need of adjusting our economic life to the changed conditions and of abandoning the policy of isolation. In the matter of recognition and relief for returned soldiers the president repeated the recommendations in his last message. He also urged tariff revision to protect our chemical and dyestuff industries. He continued:

Farmers Are Praised.

During the war the farmer performed a vital and willing service to the nation. By materially increasing the production of his land, he supplied the army and the allies with the increased amounts of food necessary to keep their immense armies in the field. He indispensably helped to win the war. But there is now scarcely less need of increasing the production in food and the necessities of life. I ask the congress to consider means of encouraging effort along these lines. The importance of doing everything possible to promote production along economical lines, to improve marketing and to make rural life more attractive and healthful, is obvious. I would urge approval of the plans already proposed to the congress by the secretary of agriculture, to secure the essential facts required for the proper study of this required through the proposed enlarged programs for farm management studies and crop estimates.

I would urge, also, the continuance of federal participation in the building of good roads, under the terms of existing law and under the direction of present agencies; the need of the action on the part of the states and the federal government to preserve and develop our forest resources, especially through the practice of better forestry methods on private holdings; rather than the publicly owned forests; better support for country schools and the more definite direction of the courses of study along lines related to rural problems and the sanitation and building up of needed hospital and medical facilities.

Blames Government for Unrest.

I would call your attention to the widespread condition of political restlessness in our body politic. The lessening of this unrest, while various causes, are superficial rather than deep seated. Probably, they arise from or are connected with the failure of the part of our government to arrive peacefully at a just and permanent peace permitting return to normal conditions.

Human Life Needs Beauty.

Men cannot live by bread alone. The mind cannot develop on an exclusively scientific diet. If we sat on our spiritual globe and studied only the physical laws that keep it going we should become either lunatics or machines. The lines of beauty in the form and decoration of a vase, and the studied harmony of tones and colors that stir the soul, as though they were musical sounds, are like to the inscriptions made on his dungeon walls by a life prisoner, who, with their aid,

To analyze the particulars in the demands of labor, to admit the justice of their complaint in many matters that lie at their basis. The workman demands an adequate wage, sufficient to permit him to live in comfort, unhampered by the fear of poverty and want in his old age. He demands the right to live and the right to work amidst sanitary surroundings, both in home and in workshop, and that he develop and do not retard his own health and well-being; and the right to provide for his children in the matter of health and education. In other words, it is his desire to make the conditions of his life and the lives of those dear to him tolerable and easy to bear.

Collective Bargaining Right. Governments must recognize the right of men collectively to bargain for humane objects that have at their base the mutual protection and welfare of those engaged in all industries. Labor must not be longer treated as a commodity. It must be regarded as the activity of human beings, possessed of deep yearnings and desires. The business man gives his best thought to the repair and replenishment of his machinery, so that its usefulness will not be impaired and its power to produce may always be at its height and kept in full vigor and motion.

No less regard ought to be paid to the human machine, which, after all, propels the machinery of the world. Return to the old standards of wages and industry in employment are unjust. The terrible tragedy of war which has just ended and which has brought the world to the verge of chaos and disaster, would be vain if there should ensue a return to the conditions of the past.

Labor not only is entitled to an adequate wage, but capital should receive a reasonable return upon its investment. Labor is entitled to protection at the hands of the government in every emergency. No government worthy the name can place these elements in conflict with each other, for there is a mutual interest between them which the government must seek to express and to safeguard at all costs. The right of individuals to strike is inviolate and ought not to be interfered with by any process of government, but there is a predominant right of the government to protect all of its people and to assert its power and majesty against the challenge of any class. The right, when it asserts a class but seeks not to antagonize a class but to defend the right of the whole people as against the irreparable harm and injury that might be done by the abuse by any class to usurp the power that only government itself has a right to exercise as a protection to all.

Hour of Test and Trial. This is the hour of test and trial for America. By her prowess and strength and the indomitable courage of her soldiers, she demonstrated her power to vindicate on foreign battlefields her conception of liberty and justice. Let her influence as a mediator between capital and labor be weakened and her own failure to settle matters of pure domestic concern be a reproach to the world.

There are those in this country who threaten direct action to force their will upon a majority. Russia today, with its blood and terror, is a painful object lesson to the power of minorities. It is little difference what minority it is; whether capital or labor, or any other sort of privilege will ever be permitted to dominate this country. We are a partnership or nothing that is worth while.

We are a democracy where the majority are the masters or all the hopes and purposes of the men who founded this government have been defeated and forgotten. In America there is but one method by which great reforms can be accomplished and the relief sought by the classes obtained, and that is through the orderly processes of representative government. Those who would propose any other method of reform are enemies of this country.

America will not be daunted by threats nor will her composure or calmness in these distressing times. We can afford, in the midst of this day of passion and unrest, to be self-contained and sure. The instrument of all reform in America is the straight road of justice to all classes and conditions of men. Men have the right to realize the full fruition of their objects and purposes. Let us beware who would take the shorter road of disorder and revolution. The right road is the road of justice and orderly process.

Low Standard.

"Germany," said Senator King of Utah, "promises to be good, but her standard of goodness seems rather low."

"Germany is like the boy whose mother said:

"'Billy, did you wash your hands?'"

"'Yes'm,' said Billy, proudly displaying a pair of clean paws."

"'Did you wash your face?'"

"'Yes'm.'"

"'Did you wash your neck and ears?'"

"'Aw, say,' snarled Billy, 'I ain't no angel, mom!'"

As It Goes.

"People are queer," said the tailor. "What's the matter now?" asked his customer.

"I offered to sell the man who just went out a suit of clothes for \$35. It was one another customer had rejected."

"Wouldn't he take it?"

"I should say not. He insisted on paying \$100 for a suit, so that he could go out and kick about the price I charged him."

Difficult Pace.

"The old-fashioned political boss seems to have vanished."

"He has," replied Senator Borah. "In order to be a boss now a man must know how to talk about League of Nations covenants and sociological relationships and supply and demand and a whole lot of subjects to which the old-fashioned boss didn't have to pay the slightest attention."

Inspiration Generally Earned.

There seems to exist a tendency to ascribe inspiration to a process which is the result of a preliminary effort. Many have noticed that, after long and fruitless mental effort, the result for which they have been striving comes to them suddenly while they are thinking of something entirely different. The preliminary mental toil has borne its fruit subconsciously.

Cosmetics, short skirts and open-work waists have been banned by the school authorities of a Brooklyn school.

FRICK LEAVES
VAST ESTATE

Public Is Heir to \$117,000,000 Fortune Left by Steel Magnate.

FAMILY WILLED \$25,000,000

Princeton, Harvard and Massachusetts Institute of Technology Get Large Bequests—Many Other Institutions Remembered.

New York, Dec. 9.—Henry Clay Frick, multimillionaire ironmaster and collector of art, left all but \$25,000,000 of his vast estate to public, charitable, and educational institutions, according to the terms of his will, made public here.

The value of the public bequests, after the \$25,000,000 is set aside for his widow, son and daughter, is \$117,000,000, exclusive of 151 acres of Pittsburgh real estate, left for a public park.

Princeton and Harvard universities and the Massachusetts Institute of Technology are bequeathed approximately \$25,000,000, divided so that Princeton will receive about \$15,000,000, and Harvard and Technology each about \$5,000,000.

About \$5,000,000 is left to the educational fund commission at Pittsburgh. Pittsburgh institutions to receive bequests amounting to about \$500,000 each, are: Children's hospital, Allegheny General hospital; Home for the Friendless, Kingsley House association, Mercy hospital, Pittsburgh Free dispensary, Pittsburgh Newsboys' home, Western Pennsylvania hospital, and the Central Young Women's Christian association.

Other \$500,000 bequests are: Uniontown hospital, Uniontown; Cottage State hospital, Connelville; West Moreland hospital, Greensburg; Mount Pleasant Memorial hospital, Mount Pleasant; Braddock General hospital, Braddock, and the Homestead hospital, Homestead, all of Pennsylvania.

The Society of the Lying-in Hospital of the city of New York is left about \$1,500,000.

Approximately \$5,000,000 in addition to her share in the \$25,000,000 left the immediate family, is bequeathed to Miss Helen C. Frick, to dispose of along the general lines of public benefit provided for in bequests to public and educational institutions.

The New York mansion, in which the Frick art collection is housed, is left to Mrs. Adelaide H. C. Frick, his widow, as long as she continues to live there. The house and the art collection together are valued at \$50,000,000. Upon her death or election to relinquish the house as a residence, the entire property is left to a corporation to be formed to maintain a "gallery of art" on the property for "encouraging and developing the study of fine arts, and of advancing the general knowledge of kindred subjects."

The trustees are directed immediately to form the corporation under the laws of New York state to be known as the "Frick Collection." The corporation is to maintain in the New York mansion a "public gallery of art." Until the corporation is completed, the art collection is to be held in trust by Mrs. Frick, Miss Helen Frick, Childs Frick, the son, and George F. Baker, Jr., J. Horace Harding, Walker D. Hines, Lewis Cass Ledyard, John D. Rockefeller, Jr., and Horace Havemeyer.

Fifteen million dollars are left in trust to the same persons for the maintenance and improvement of the Frick Art Collection, house and grounds.

A tract of land in Pittsburgh, about 151 acres, in the Fourteenth ward and bordering on the Homewood cemetery, is left to the city of Pittsburgh, to be maintained as a public park. Two million dollars are left to the Union Trust company of Pittsburgh, as trustees, for maintenance and embellishment of the park.

Executors of the will, under its direction, are given as Mrs. Adelaide H. C. Frick, Miss Helen Frick, Childs Frick, and Henry C. McElldowney and William Watson Smith, both of Pittsburgh. McElldowney and Smith receive \$250,000 each as their fees.

SHOOT AT GEN. OBREGON

Carranza Troops Open Fire While Commander Makes Address in Interests of Candidacy for President.

Washington, Dec. 9.—Private advices received here from Mexico said Carranza troops at Pachuca, state of Hidalgo, fired on the followers of Gen. Obregon while the general was making a public address in the interest of his candidacy for the presidency. No details were given.

Auction Government Motorcars. Baltimore, Dec. 9.—During a three-day auction sale of automobile trucks, touring cars and motorcycles at Camp Holabird, 1,055 motor vehicles were disposed of for the government, realizing in the aggregate \$300,000.

U. S. Army Captain Arrested. London, Dec. 9.—Capt. Albert Tannery, U. S. A., has been arrested at Limoges on charges in connection with the theft of 200 automobiles stored in an American camp in the department of Finisterre.

FLU CAUSES SIX
DEATHS IN CHICAGO

The weekly bulletin of the health department issued yesterday, shows that six persons died in Chicago last week as result of influenza. Dr. W. A. Evans, health authority and writer of Chicago, last week predicted that the epidemic of influenza far more severe than last year, when thousands of lives were lost. One thing is sure, that is, the warm weather down, but as has kept the epidemic down, but as is liable to break out any time. Dr. Brady says: "No one has as yet discovered a positive method of diagnosing early cases of influenza from alleged 'colds.'" The utmost care should be taken, therefore, not to catch cold, for colds weaken the resistance to influenza germs.

Doctors seem to agree that it is much easier to prevent influenza than to cure it. The secret of preventing influenza is to keep the germs from lodging and developing in the respiratory organs—the mouth, nose and throat. No one should be allowed to breathe in your face because the germs are often transmitted in this manner.

Influenza can be prevented; last year's results prove that. As a preventive for Flu, Turpo has been a pronounced success. Turpo is an effective germicide, combining the old-fashioned remedies of turpentine (which has always been known as a best home germicide), camphor and menthol in a pure mineral base. These ingredients have long been recognized as effective germicides, as well as having really wonderful qualities in relieving colds and congestions. Snuffing Turpo up the nostrils several times a day, and the Flu germs have little chance of getting a lodging and breeding place. Many physicians and hospitals use and recommend Turpo.

Prepare now. Buy a thirty cent jar of Turpo, while your druggist has a supply on hand, and use as directed. Last year's druggists could not supply the demand. Remember that Turpo is a preventive, not a cure for influenza. Take care of yourself.—Adv.

Replacing Sugar With Cotton.

According to the South African Journal of Industries for July, 1919, the replacement of cane by cotton in parts of Zululand is being taken notice of by the sugar industry.

A number of planters declare that they find cotton more paying and a more promising crop than sugar.

A great advantage in favor of cotton is that a crop can be planted and harvested within about six months and does not involve the heavy expenditure for wagons, track and vehicles, such as is essential with cane.

"THESE ARE MY JEWELS"

"These are my jewels," said Cornelia, the mother of the Gracchi, two thousand years ago, when asked to show her jewels, and presented her sons. And the best jewels of any manufacturer are his products enjoying a world-wide renown. Every remedy has to live or die on its merits. Triner's American Elixir of Bitter Wine was brought to market 30 years ago. Today it has the reputation of the most dependable remedy for constipation, indigestion, flatulence, headaches, nervousness, and other stomach troubles.

Tonic, Triner's Liniment for rheumatism and neuralgia, Triner's Cough Sedative and other Triner's remedies which you can all get at your druggist are in the same favor with the people of the United States and Canada. "These are our jewels," says the Joseph Triner Company, 1333-35 S. Ashland Ave., Chicago, Ill.—Adv.

Seeing Things.

Flatbush—You know mirrors do wonders toward brightening up a home.

Bensonhurst—I know it. My wife always seems happier when she sees herself in a lot of mirrors around the house.

Catarrhal Deafness Cannot Be Cured

by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure Catarrhal Deafness, and that is by a constitutional remedy. HALL'S CATARRH MEDICINE acts through the blood on the mucous surfaces of the system. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing may be destroyed forever. Many cases of Deafness are caused by Catarrh, which is an inflammation of the mucous surfaces.

ONE HUNDRED DOLLARS for any case of Catarrhal Deafness that cannot be cured by HALL'S CATARRH MEDICINE.

All Druggists Sell Circulars free. F. J. Cheney & Co., Toledo, Ohio.

Light Waves' Pressure.

By the use of delicate apparatus which he invented a Russian scientist has demonstrated that light waves exert a measurable mechanical pressure.

Important to Mothers

Examine carefully every bottle of CASTORIA, that famous old remedy for infants and children, and see that it bears the

In Use for Over 30 Years. Children Cry for Fletcher's Castoria

Snake's Rattles.

The rattles of the rattlesnake are but a number of small bones on the tail so loosely fastened together that they make a clinking noise when shaken.

The Way to Them.

"Why did you ask the waiter if he knew of any barnyard terminals?"

"That's the code for cocktails."

FARM STOCK

PREVENT HORNS ON CALVES

Either Caustic Soda or Caustic Potash Without Other Substances Is Satisfactory.

(Prepared by the United States Department of Agriculture.)

When circumstances are favorable, as in the case of farmers who build up their herds by raising the progeny, the horns may be prevented from growing by a simple and practically painless method, and the custom of preventing the growth of the horns is becoming more popular and more generally practiced under all conditions except in the case of calves dropped on the open range. The calf should be treated not later than one week after its birth, preferably when it is from three to five days old. The agent to be used may be either caustic soda or caustic potash, both of which may be procured in the drug stores in the form of sticks about the thickness of an ordinary lead pencil and 5 inches long. These caustics must be handled with care, as they dissolve the cuticle and may make the hands or fingers sore. The preparation of the calf consists in first clipping the hair from the parts, washing clean with soap and warm water, and thoroughly drying with a cloth or towel. The stick of caustic should be wrapped in a piece of paper to protect the hands and fingers, leaving one end of the stick uncovered.

Moisten the uncovered end slightly and rub it on the horn buttons or little points which may be felt on the calf's head, first on one and then the other, alternately, two or three times on each, allowing the caustic to dry after each application. Be very careful to apply the caustic to the horn button only. If it is brought in contact with the surrounding skin it will cause pain. Be very careful also not to have too much moisture on the stick of caustic, as it will remove the skin if allowed to run down over the face. After treatment, keep the calf protected from rain, as water on the head after the application of caustic will cause it to run down over the face. This must be carefully avoided.

Either caustic soda or caustic potash alone, without the admixture of other substances, answers the purpose satisfactorily. Some years ago, however, certain preparations or "dehorning compounds," composed largely of one or the other of these caustics, were generally used, and as inquiries are still occasionally received concerning such preparations, the following formula is given: Combine in an emulsion 50 per cent of caustic soda,

Custom of Preventing Growth of Horns Is Becoming More Popular.

25 per cent of kerosene, and 25 per cent of water. The caustic soda is dissolved in the water and heated to the boiling point, then removed from the fire, and the kerosene added gradually, while the mixture is vigorously stirred. This emulsion is applied in very much the same manner as the stick caustic, except that it is necessary to employ a short, stiff brush. Sometimes a meat skewer is used, the large end being mashed to form a stubby brush. Two or three applications should be made to each horn button, as in the case of the stick caustic, with intervals to allow it to dry.

In the very young calf the horn button, or point that will ultimately develop into a horn, has scarcely any attachment to the skull, and may be felt as a small button embedded in the skin. In this early stage it may be easily removed with a sharp knife or a pair of curved scissors, but even then caustics should be applied to kill any remaining cell life belonging to this germ point; otherwise there may be some subsequent irregular horn growth, which is more or less of a disfigurement.

SHIPPING SWINE IN SUMMER

Proper Care Should Be Taken Not to Load Too Heavily—Most Common Cause of Loss.

When shipping hogs in warm weather care should be taken not to load too heavily. Too heavy loading is one of the most common causes of loss in shipments of hogs.

Travelling Teachers.
Travelling teachers carry education to inland children along the coast of Maine, remaining in each isolated district a brief time.

Cleaning Wall Paper.

One of the simplest ways to clean wall paper is to take a loaf of stale but not hard bread and cut off the crust; then taking it in one hand rub the paper gently with the exposed surface. When the bread looks soiled cut off another thin slice and proceed with the work. It is best to rub up and down on the paper.

This Mash Means More Eggs

VITALITY EGG MASH is the best egg mash on the market today. To get eggs you must feed protein. There are different kinds of protein such as cereal proteins, animal proteins, vegetable proteins and the protein from milk. The protein from milk is much more valuable because

the animal or fowl retains nearly twice as much of it as any of the others. VITALITY EGG MASH contains cereal, animal and vegetable proteins, ALSO THE MILK PROTEIN. It should be fed in hoppers where they can have access to it at all times. Vitality Scratch should be fed in the litter to make them exercise.

and This Hopper

This Hopper FREE

Here is a hopper that will hold enough for the ordinary pen one week. It is made of galvanized steel, is sanitary, rat proof when closed, and will last a life time. With every 100 pounds of VITALITY EGG MASH you get a coupon. When you have four coupons present them and get one of the hoppers free. Start feeding VITALITY today and get more eggs.

Feed ten hens half of one hundred pound sack of EGG-A-DAY DRY MASH according to our directions and if the result is not an increase in egg production, we will take back the unused sacks of feed, and refund the full price of the entire purchase.

You Can Get 210 More Eggs per Hen a Year

It is a recognized fact that average grain fed Hens form about 280 YOLKS per year. U. S. Government records show that only an average of 70 EGGS are produced out of this possible 280. Why? Because grain fed Hens lack the proper albumen or whites necessary to complete the eggs—thus a waste an average loss of 210 eggs per hen yearly. The missing 210 yolks which are never "shelled out" are absorbed into the Hen's system.

EGG-A-DAY Dry Mash fed Hens will produce as many EGGS as they produce YOLKS—which means an average of about 210 more eggs per Hen a year. EGG-A-DAY Dry Mash is a food that produces the necessary whites and shells to allow every yolk "to be shelled out" properly—instead of being absorbed into the Hen's system. EGG-A-DAY is most economical. Absolutely no waste—no mixing.
